

Water Closet Pipes with Flange or Tee, 4 in. each.
STRAIGHT TUBES, with Flange or Tee, in 1 foot lengths.

The great advantage attending the use of these articles is not so generally understood, as to preclude any recommendation of them almost everywhere. Their economy, efficiency, and durability, are universally admitted, while it is easily to be readily demanded by those persons who, by constant experience, have every other kind of article, before the public for similar purposes.

Inspection is invited to an extensive stock of Drain Tubes, of every form as above, adapted to the various uses to which they may be required, as also the WATER-CLOSET FLANGES UP TO 12 INCHES, and the WATER-CLOSET PHOTOGRAPHIC CONSTRUCTION, and of the superior class the surplusage, one only was abandoned of Brown Block Water.

N.B. These are made without the discharge hole being inserted downwards.

May be had also at Messrs. GRADDISBILLS & WHEAT, Fidelity Ave., Westminster bridge, City Road, City, Lancs.; Doe & Co., Birmingham; District of Wharf for the London & North Western Railway, London N.W. 2000.

Drawings and List of Prices will be forwarded on application.
